SEAT MEASUREMENT CHART

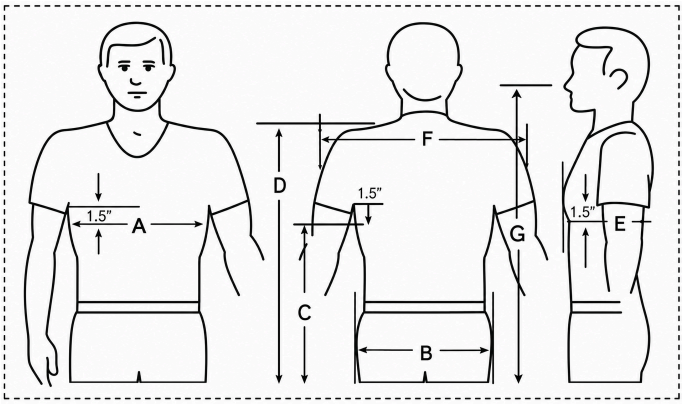
1-800-832-7292 | ultrashieldrace.com
info@ultrashieldrace.com

IMPORTANT INFORMATION

Every measurement is a straight line — do not wrap the tape around the body.
Following the curve of the body reads long and the seat comes out too big. A stagger stick or straight edge placed parallel to the body will help with the measurements. We build in house, so any size can be custom fit.

SEATED POSITION — USED FOR B1, B2, C, D AND G

Sit on a flat, hard surface, legs hanging over the edge, hands up as if holding the steering wheel. Relax and sit the way you actually sit in the race car, with your shoulders level. **Do NOT sit straight up and down.** All heights are measured up from that flat surface.



A **Width of chest** STANDING
Arms raised slightly. Measure side to side, 1½" below the armpits.

B1 **Width of hips** SEATED
Near the back of your hips, where your lap belts cross your body. A cinder block or flat board against each hip at snug but comfortable pressure; measure between them. Standing alternative: the widest point of the hips.

B2 **Width of thighs** SEATED
Measured the same way as B1, but across the thigh area.

C **Height of armpit** SEATED
From the flat surface up to 1½" below the armpit.

D **Height of shoulder** SEATED
Flat surface to the top of the shoulder. **Easiest with a helper:** lay a flat hand on top of the shoulder and measure up to the bottom of the hand.

E **Chest depth** STANDING sets rib support length
Back flat against a wall. Wall to front of chest, 1½" below the armpit.

F **Width of shoulders** STANDING
Arms relaxed at the sides. Outside to outside, 2" down from the top of the shoulders.

G **Height of cheek** SEATED
Looking straight ahead, measure from the flat surface to the tip of the nose, or the bone just under the eye. We want the halo as high on the cheek bone as possible while the driver still has clear vision over it.

RECORD MEASUREMENTS

Is the driver having a foam insert poured with a 3rd party? ☐ Y ☐ N

SAFETY EQUIPMENT

Head & neck style _____

_____

A third-party poured insert (Sharp Advantage or similar) needs a larger seat for the space it fills. We add that room to your measurements. Don't add it yourself.

NOTES

Send the finished sheet to **info@ultrashieldrace.com**.
Custom orders are billed before the seats are built. We'll call you for payment, so don't write card details here.

CUSTOM SEATS ARE NON-REFUNDABLE
